## PUUTAVARAT

| Kohde       | Koko [mm]    | Oma koko | Oma määrä |
|-------------|--------------|----------|-----------|
| Tolpat      | 100x100x1500 |          |           |
| Laudat      | 20x120x2100  |          |           |
| Päälyslauta | 28x145x2100  |          |           |
|             |              |          |           |
|             |              |          |           |
|             |              |          |           |
|             |              |          |           |
|             |              |          |           |

## RUUVIT (RST = ruostumaton teräs EN 1.4301 tai AISI 304)

| Kohde       | Paksuus [mm] | Pituus [mm]              | Oma määrä |
|-------------|--------------|--------------------------|-----------|
| Laudat      | 4,0...5,0    | 2...2,5 x laudan paksuus | RST       |
| Päälyslauta | 4,0...5,0    | 2...2,5 x laudan paksuus | RST       |
|             |              |                          |           |
|             |              |                          |           |
|             |              |                          |           |
|             |              |                          |           |
|             |              |                          |           |
|             |              |                          |           |
